EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William T. Ellis (Reg. No. 26,874) on January 4, 2007.

The application has been amended as follows:

Amend claim 1 as follows:

At line 3, after the limitation "image" insert "having an edge direction"

At line 5, after the limitation "verified" insert "based on verification conditions"

At line 8, delete the first occurrence of "the" and replace it with "a"

At line 8, delete the limitation "from" and replace it with "of"

Amend claim 8 as follows:

At line 3, after the limitation "image" insert "having an edge direction"

At line 5, after the limitation "verified" insert "based on verification conditions"

At line 8, delete the first occurrence of "the" and replace it with "a"

Amend claim 10 as follows:

At line 8, after the limitation "image" insert "having an edge direction"

At line 10, after the limitation "verified" insert "based on verification conditions"

At line 12, delete "the" and replace it with "a"

Art Unit: 2624

At line 17, delete the limitation "extrcted" and replace it with "extracted"

Reasons for Allowance

2. Claims 1-19 are allowed.

3. The following is an examiner's statement of reasons for allowance: upon acquisition of a gray-scale image, the instant invention extracts edge pixels of the image having an edge direction, and while sequentially considering the extracted edge pixels, an edge pixel verified based on verification conditions to have a density gradient direction opposite to the edge pixel under consideration is searched for within a predetermined range in a direction orthogonal to the edge direction of the edge pixel under consideration. Thereafter, the instant invention sets a line segment parallel to the edge direction of the edge pixel under consideration, which passes through a predetermined position from the extracted edge pixel to the edge pixel under consideration, and displays an image indicating the result of setting the line segment when there is no edge pixels to be considered. These elements in combination with other elements of the claims are not disclosed or fairly suggested by any of the prior art of record.

comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent Numbers: 5081689, 6625303, 6885771, and 7116823.
